

SHAMROCK MECHANICS HELP TO IMPLEMENT CUSTOMER'S MAINTENANCE PROGRAM

September 2011

Shamrock Management's Mechanical Maintenance business unit is very excited about the opportunity to assist one of our customers, Stone Energy, in the implementation of their new preventative maintenance program.

At a recent crew change Stone Energy announced that they will begin implementation of a new preventative maintenance program at their South Tambalier and Pelto Fields. The South Tambalier field is maintained by Shamrock Management mechanics and electricians.

The Shamrock Management crew will have the opportunity to work alongside Stone Energy's new maintenance foreman to implement and tweak the program to then be integrated into the remainder of Stone Energy's properties.

The Shamrock Management mechanics and electricians working the South Tambalier field include Travis Brawner, Glenn Bearden, Raymond Moore and Gerald Broussard.
